

Manage projects, lead engineering teams, and advance your career in 2022.

■ About the program

Developed and delivered by world-renowned Ira A. Fulton Schools of Engineering faculty, the Engineering Project Management certification course develops skills and creates a road map for the engineering project team to successfully deliver projects within scope, on schedule, and on budget.

■ What you will learn

With successful completion of this course and execution of the applied project, participants will have a core understanding of engineering project management fundamentals, the project life cycle, key project deliverables and how to apply that knowledge to bring value to their organizations.

The upcoming **5-week** certification course runs from **October 20–November 17, 2022**.

The course is offered in a virtual, synchronous training format, meeting for one **3-hour zoom session** per week, **Thursdays from 3p.m.–6p.m.**

The course is followed by a **30-day** applied project phase. Where participants will implement their newly acquired skills via a workplace project with expert coaching.

Total program cost: **\$1,950**
